Press release

PragmaDev launches
Real Time Developer Studio V1.0

Paris - France - Feb. 11, 2002 - *PragmaDev* launches *Real Time Developer Studio* V1.0, the first commercial off the shelf tool based on SDL-RT graphical language to develop real time software.

Real Time Developer Studio targets all development teams working with a Real Time Operating System. It is based on graphical representations of traditional concepts used in real time domain without leaving behind legacy code and years of experience. Its pragmatic approach and low price make it a good candidate to be widely spread in a market where 90% of the developments use no graphical tools.

Real Time Developer Studio V1.0 generates full application code out of SDL-RT design embedding Wind River VxWorks primitives as a default RTOS. Wind River debugging environment is used in the background allowing graphical debugging and tracing.

Real Time Developer Studio V1.0 uses floating licenses that can be distributed over a network and runs on Windows 2000, Solaris 7, and Linux.

About PragmaDev

PragmaDev is a privately held company based in Paris France that provides a set of tools for the development of real time and embedded software: *Real Time Developer Studio.*

Real Time Developer Studio technology was one of the winners of the 2001 edition of the national competition on innovative technologies organized by the French ministry of research.

*PragmaDev* is a Sun Microsystems and a Wind River Systems active partner.

About SDL-RT

SDL-RT (Specification and Description Language - Real Time) is the real time extension to well known SDL (Specification and Description Language) standardized by ITU (International Telecommunication Union). It introduces the missing concepts to SDL such as semaphores manipulations and embedded C language gathering the original languages benefits:

- Graphical representations
- Object orientation
- Precision

SDL-RT is free and available on http://www.sdl-rt.org.

PragmaDev and Real Time Developer Studio are registered trademarks of PragmaDev.
All other names mentioned are trademarks, registered trademarks or service marks of their respective companies.
